TS Coffee Table Square

The TS Coffee Table Square creates a sophisticated and sculptural aesthetics for any room with its characteristic slender legs, beautifully crossing details and contrasting solid table top.

The timeless TS Coffee Table Square by GamFratesi is extended from the classic TS Table, made for the renowned restaurant The Standard in Copenhagen, where not only its name got its inspiration but also aesthetics and material choices were found.

Gravity Table Lamp

The new Gravity Collection designed by Space Copenhagen, consisting of a table lamp and a floor lamp, is aesthetically contrasting strength and fragility. Taking its name from the lamp's distinctive balance between the anchoring of the heavy, cylindrical base and the lightweight, airy shade, it beautifully merges into a sculptural whole.

Blending understated elegance, clean functionality and effortless in its own succinct and simple way, the Gravity Lamp gives an ambient and subtle light display and creates different moods and expressions depending on the choice of size and combination of materiality.

GMG Chaise Longue

The GMG Chaise Longue was designed in 1951 by Greta M. Grossman and with playful elegance it is perfectly angled for lounging whilst preserving all the streamlined qualities of a mid-century design. Built in a shape designed for relaxation it mirrors the body's natural curves while appearing to float above its distinctive slender legs – a genuine signature of Greta M. Grossman's work. The GMG Chaise Longue shows a strong interest

in merging functionality and comfort, while simultaneously remaining a delicate and powerful design language, revealing unique, light and iconic touches. Representing a literal link between European design and Californian modernism, Grossman designed the GMG Chaise Longue by successfully combining her Swedish fondness for colour and texture with the opportunities allowed by bright and open spaces of Southern California.

Multi-Lite Floor Lamp

Louis Weisdorf's contemporary and classic design philosophy is echoed in the new Multi-Lite Floor Lamp. With its timeless elegance, distinctive style and unique multi-functionality, the Multi-Lite Floor Lamp brings life and character to any interior space.

The Multi-Lite lamp design was created in 1972 by the Danish architect Louis Weisdorf with the aim of reflecting his passion for diversity. Due to its unique design, the two opposing outside shades can individually be rotated and transformed into multiple combinations and encourage for personal installations and expressions whenever desired.

Always with Weisdorf's design philosophy in mind, the light can be directed upwards, downwards or exude an asymmetric art light without exposing the light source.

Two cylindrical shapes lay the foundation of the lamp and a metal ring encompasses it and anchors the two quarter-spherical shades, which ultimately completes a picture of an iconic design with multiple purposes. The decorative Multi-Lite Floor Lamp is an evolution of the pendant design and perfectly suited for creating a festive ambient light in the domestic living room.

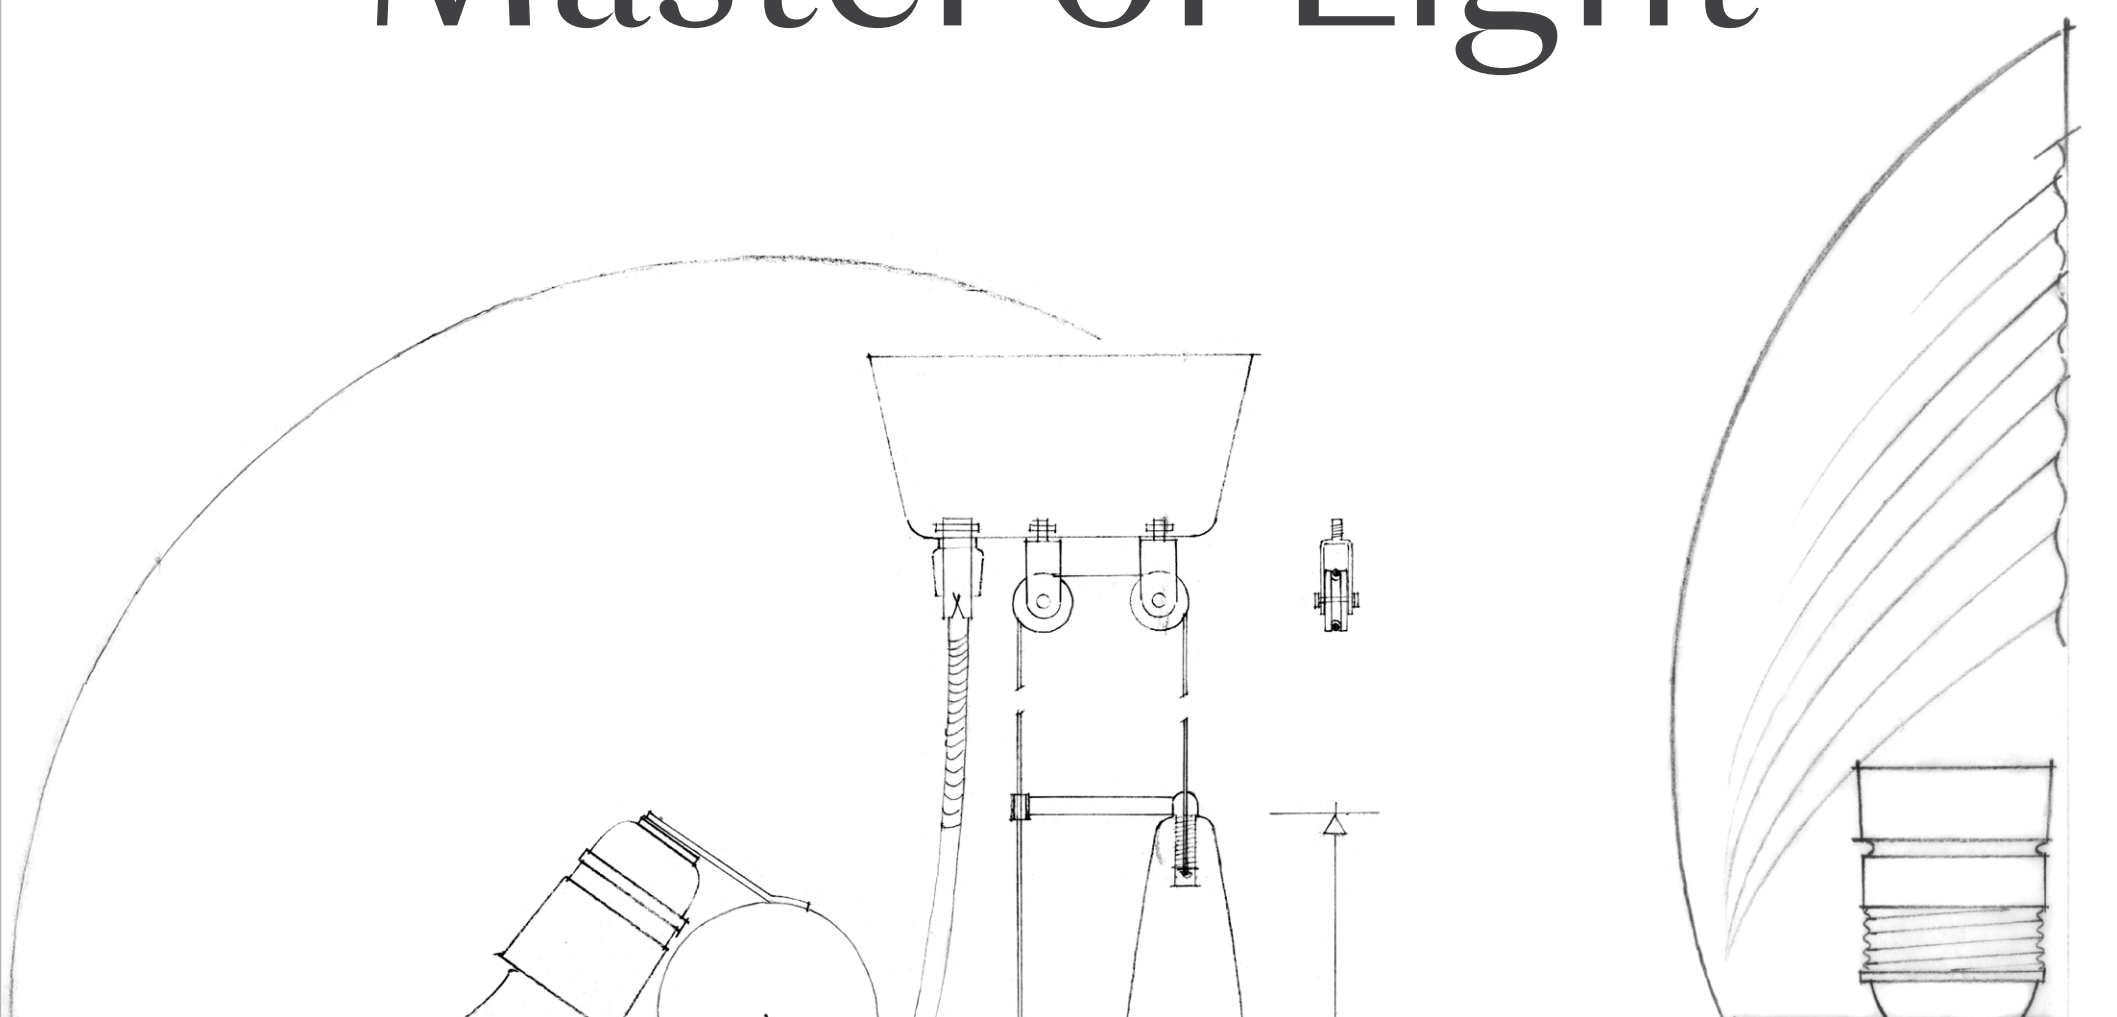

Paavo Tynell

Master of Light

Paavo Tynell (1890-1973) was an industrial designer, known as the great pioneer of Finnish lighting design and fondly dubbed as “the man who illuminated Finland”. A master craftsman himself, Tynell’s designs were derivative of a traditional aesthetic with a modern sensibility, mixed with an extensive use

of perforated and polished brass as material. Marked by delicacy and softness, his most famous forms in lighting echo the structures of nature; he adroitly created sculptural shapes reminiscent of the branches of trees, swirling snowflakes and seashells.

designed by

Paavo Tynell

1930 Paavo Tynell rose to prominence in the 1930s and 40s where he collaborated with some of the most renowned Finnish architects, Alvar Aalto being the most notable one. Working to incorporate artificial lighting into modern environments, Tynell’s company Taito Oy produced fixtures for all of Alvar Aalto’s major projects including the Paimio Sanatorium and the Viipuri Library.

1918 Tynell was one of the founders and chief designers of Taito Oy – the first industrial producer of lighting fixtures in Finland, founded in 1918. With the innovation of electricity in the beginning of the 20th century, Taito Oy and Tynell expanded the thinking and manufacturing of modern lighting solutions in Europe and abroad.

1948 Tynell was especially appraised through his involvement with the Finland House, a design atelier in New York that showcased the work of Finnish designers and craftspeople. His elegant brass designs became an instant success in North America, and he began creating lighting designs for the prestigious American company Lightolier.

1965 Pendant

The 1965 Pendant was originally designed by Paavo Tynell in 1948. Like many of his best-known designs, the pendant was designed for the Finland House in New York - one of the most ambitious and successful projects of all time to showcase Finnish design.

Perfecting the techniques of metal finishes, Tynell developed the 1965 Pendant with his exceptional ability to capture and translate a

grace and exuberant lightness into his brass creations. Characterized by its triangular perforation pattern, an artistic detail utilised by Tynell in several of his lighting objects, the 1965 Pendant reflects the distinguished craftsmanship of the Finnish designer. With a frosted glass diffuser that softens the light, the pendant contributes to a subtle and tranquil environment.

A1965 Pendant

Unveiled in 1948 at the Finland House in New York, the A1965 Pendant was an instant success for Paavo Tynell and one of the lighting fixtures considered to define his mid-century peak. It delicately holds some of his most distinctive design traits; the perforated and polished brass material combined with a unique lift mechanism, raising and lowering the lamp to different heights. The A1965 Pendant gracefully diffuses the light downwards through frosted glass, omitting glare whilst gently illuminating the room.

The hanging counterweighted A1965 Pendant was Tynell's attempt to add lighting mobility to the ceiling fixture and combining the advantages of the portable and the installed lamp. The impeccable construction of the A1965 Pendant fully reveals Paavo Tynell's knack for elevating ordinary light fixtures into functional art and this remarkable style played a significant role in shaping the aesthetic of mid-century lighting.

5321 Table Lamp

Paavo Tynell's fanciful take on nature is gracefully echoed in the 5321 Table Lamp, designed by the Finnish designer in 1941. Under the distinctive shell-inspired brass shade, the bulb subtly appears from beneath; a picturesque detail resembling the desirable sea shell pearl and making the 5321 Table Lamp a perfect example on how Tynell brought a playful nature and romance to the

simplified style of mid-century modernism. Blending timeless aesthetic with a unique sense of form, the 5321 Table Lamp adds an exquisite character to complement any modern space. Both decorative and functional, the lamp is a balance of elegance and curiosity, providing a design that is at once subtle and surprising.

9602 Floor Lamp

The 9602 Floor Lamp, also known as "Chinese Hat" was designed by Paavo Tynell in 1938 for the Hotel Aulanko. Characterised by its elegant and airy lampshade and rattan-covered stem, the 9602 Floor Lamp shows the designer's limitless imagination and unparalleled

ability to create designs of enduring beauty. Adding a playful, exuberant quality to the top, balanced by the more static form of the base, the 9602 Floor Lamp is perfectly suited for creating a gentle ambient light in the domestic living room.

9464 Wall Lamp

The 9464 Wall Lamp, designed in the early 1950's by Paavo Tynell, is a great example on how the Finnish designer elevated illumination into an art form. The clean, sculptured brass shade lends an air of elegance with Tynell's distinctive traits of twin dot perforation pattern combined with notched edges, making the wall

lamp appealing and admirable in all its simplicity. Equally relevant today as when first introduced, the 9464 Wall Lamp fits perfectly into contemporary interiors, adding a sculptural effect to the wall whilst simultaneously creating a relaxed yet very refined indirect lighting.

Bestlite - Black Brass

To mark the occasion of GUBI's 50th anniversary, we are proud to launch one of the most groundbreaking light designs through time - the Bestlite Collection, in black brass. Bestlite was the first collection to be reproduced by GUBI and has ever since been an important part of our DNA and contributing to our success. With the introduction of the black brass version, the Bestlite Collection becomes one of the world's most complete and functional lamp collection on the market.

Bestlite BL1 Table Lamp, BL2 Table Lamp, BL3 Floor Lamp, BL4 Floor Lamp, BL5 Wall Lamp, BL6 Wall Lamp, BL7 Wall Lamp and BL9 Pendant (all versions except from BL9 L & XL Pendant and BL10 Wall Lamp) are honored with an elegant lamp stand in black brass, which contributes to a luxurious antique look, and supplied with a shade in the same finish, bone china or classic white. A beautiful combination that perfectly marries traditional aesthetics with contemporary thinking.

GT Lounge Chair

The GT Lounge Chair was designed by Greta M. Grossman in 1949 and with its sleek and feminine lines, it expresses the influence that Scandinavian design had on her. Designed for comfort as well as aesthetics, her timeless lounge chair has a feminine and light silhouette that is supported with elegant slender legs, which is a true signature for Greta M. Grossman's designs. The GT Lounge Chair, which she showcased at her prestigious Los Angeles store on Rodeo Drive was like most of her furniture custom built or produced in exceptionally small numbers.

Modern Line Side Table

The Modern Line Side Table was first produced in 1949 by the feminine pioneer Greta M. Grossman and with its simple forms it successfully combines lightness and functionality into a modern yet organic character. Its slender metal legs produce a playful silhouette, while the linoleum table top with different colour options creates an eye-catching feature indicative of Grossman's designs. Highly versatile, the Modern Line Side Table is perfectly suitable as a coffee table, side table or occasional table when extra space is needed.

B-4 Table Lamp

The B-4 Table Lamp by Greta M. Grossman was designed in 1945 and bears her whimsical and powerful signature style. With playful angles and geometric elements, the table lamp is characterized by its colourful and movable visors allowing light to diffuse softly around any table it stands on. The lamp fits effortlessly into almost any environment, adding a dash of American modernism panache to the room.

The silhouette of the B-4 Table Lamp, with its stilt base and alternating colour panels, resembles some of Greta M. Grossman's most iconic architecture more than any other design item from her career. Typically, her houses were perched high up on stilts with cantilevered decks and walls of glass to take in the magnificent hillside views of Southern California - and with a fanciful style the B-4 Table Lamp beautifully reflects her modernist design principles.
