

Struttura: in legno multistrato di vari spessori. Preparazione della struttura sedile, braccioli e schienali in poliuretano espanso a quote differenziate ad alta densità. Braccioli e schienali rivestiti successivamente con trapuntino di fibra di poliestere termolegata traspirante accoppiata con tela di cotone bianca.

Tutti i materiali impiegati per realizzare il trapuntino sono anallergici e prodotti con materiali riciclati.

La confezione della fodera della struttura schienale/bracciolo e dei cuscini sedile e schienale è contraddistinta da un profilo e da morbide impunture d'ispirazione couture che conferiscono un'immediata sensazione di comfort grazie alla leggera curva dello schienale e del bracciolo. Per aumentare la sofficietà, la fodera dello schienale/bracciolo prevede una trapuntatura che accoppia la fibra termolegata di forte spessore con la tela di cotone bianca, alla fodera.

Cuscineria: imbottitura cuscini sedile e schienale in piuma d'oca canalizzata ad alto spessore, per conferire grande sofficietà ed aumentare il comfort, sottoposta a regolare trattamento di bonifica igienico-sanitaria come stabilito dal Regolamento CE 1069/2009 (certificata Assopiuma, Etichetta Oro). Successivamente rivestiti da fibra termolegata traspirante accoppiata con tela di cotone bianca anallergica. Cuscini sedile con inserto in poliuretano espanso a quote differenziate ad alta resilienza, rivestito nella parte superiore con materiale poliuretano termosensibile. Cuscini schienale con inserto centrale in poliuretano espanso a quote differenziate ad alta resilienza in materiale anch'esso termosensibile e sagomato per adattarsi perfettamente alla raffinata e funzionale conformazione dello schienale imbottito.

Sfoderabilità: struttura, cuscini sedile e schienale completamente sfoderabili in tutte le versioni (tessuto o pelle).

Basi: portanti in estruso di alluminio verniciato lucido anti-touch color Bronzo e scivolante protettivo in polietilene di colore bronzo.

Per permettere la sfoderabilità, gli elementi schienale/bracciolo sono facilmente sfilabili dalle loro sedi agendo sulle apposite manopole poste sotto la struttura portante.

Questa operazione, in casi necessari, può essere eseguita anche per agevolare il trasporto e la consegna.

Structure: in plywood of various thicknesses. The seat, armrest and backrest structures are coated in high-resilience variable-density polyurethane foam. Armrests and backrest are then encased in a breathable heat-bonded quilted fibre laminated to white cotton fabric. All of the materials employed in manufacturing the quilting are hypoallergenic and made with recycled materials. Tailoring of the backrest/armrest structure upholstery and of the seat and backrest cushions is distinguished by piping and couture-inspired soft top-stitching that convey an immediate sense of comfort, thanks to the slight curve of the backrest and armrest.

To increase fluffiness, the backrest and armrest upholstery has quilting that joins the thick heat-bonded fibre encased in white cotton fabric to the upholstery.

Cushions: seat and backrest cushions, padded in high-loft channelled goose down to lend greater softness and increase comfort, undergo routine sanitization as specified in EC Regulation No. 1069/2009 (Assopiuma certified, Gold Label). They are then encased in breathable heat-bonded fibre laminated to white hypoallergenic cotton fabric. Seat cushions with high resilience, variable-density polyurethane foam insert are covered in the upper part with temperature-sensitive polyurethane material. Backrest cushions with core insert in high-resilience, variable-density polyurethane foam in material that is also temperature-sensitive and contoured to adapt perfectly to the sophisticated, functional shape of the upholstered backrest.

Covers: upholstery for the structure, seat and backrest cushions is completely removable in all versions (fabric and leather).

Bases: weight-bearing, in extruded aluminium varnished polished anti-fingerprint Bronze colour finish and bronze colour protective polyethylene glides.

For removal of upholstery, the backrest/armrest elements can easily be lifted out by releasing the levers located underneath the support structure. If needed, this operation can also be used to facilitate shipping and delivery.

Struktur: aus Sperrholz in verschiedenen Stärken. Polsterung der Sitzflächenstruktur, der Arm- und der Rückenlehnen aus PU-Schaum mit differenzierter, hoher Dichte. Arm- und Rückenlehnen mit zusätzlicher gesteppter Polsterung aus atmungsaktiver, thermofixierter Faser mit Bezug aus weißer, antiallergischer Baumwolle. Alle, für die gesteppte Polsterung verwendeten Materialien sind antiallergisch und bestehen aus recycelten Materialien.

Die Konfektionierung des Bezugs der Struktur von Rücken- und Armlehne und der Sitz- und Rückenlehnen zeichnet sich durch ein Profil und weiche Steppnähte aus, die sich an der Haute Couture inspirieren und mit der leicht geschwungenen Rückenlehne und Armlehne ein unmittelbares Gefühl von Komfort vermitteln.

Um den Sitzkomfort zu erhöhen, ist der Polsterung der Rückenlehne und der Armlehne mit einer Steppung ausgeführt, die die thermofixierte, sehr dicke Faser mit Bezug aus weißer Baumwolle mit der Polsterung verbindet.

Kissen: Rücken- und Sitzkissen mit gesteppter Daunenfüllung mit Kammern und Innenstegen mit hoher Stärke für weiche Kissen und mehr Sitzkomfort, die nach Vorgabe der Verordnung (EU) 1069/2009 (zertifiziert Assopiuma, "Goldenes Etikett") ordnungsgemäß sterilisiert worden ist. Zusätzliche Polsterung aus atmungsaktiver, thermofixierter Faser mit Bezug aus weißer, antiallergischer Baumwolle.

Sitzkissen mit zentralem Einsatz aus hochwiderstandsfähigem PU-Schaum mit differenzierter Dichte mit Polsterung auf der Oberseite mit thermosensitivem Memory-Schaum. Rückenkissen mit zentralem Einsatz aus hochwiderstandsfähigem PU-Schaum mit differenzierter Dichte, der ebenfalls thermosensitiv und geformt ist, um sich perfekt an die elegante und funktionelle Form der gepolsterten Rückenlehne anzupassen.

Abziehbarkeit: Struktur, Sitz- und Rückenlehnen sind in allen Versionen (Stoff oder Leder) komplett abziehbar.

Basis: Tragende Kufen aus extrudiertem Aluminium mit glänzender Anti-Touch-Lackierung und Schutzgleiter aus Polyethylen in der Farbe Bronze.

Für das Abziehen der Bezüge können die Rückenlehnen und Armlehnen mit Hilfe der speziellen Drehknöpfe unter der tragenden Basis leicht aus ihren Sitzen gezogen werden. Bei Bedarf kann diese Möglichkeit auch genutzt werden, um den Transport und die Lieferung des Sofas zu erleichtern.

Structure: en multipli de différentes épaisseurs. Préparation de la structure de l'assise, des accoudoirs et des dossiers en mousse polyuréthane à densité différenciée haute densité. Accoudoirs et dossiers recouverts ensuite d'un tissu multicouche matelassé en fibre de polyester thermoliée respirante et toile de coton blanche.

Tous les matériaux utilisés pour la réalisation du tissu multicouche matelassé sont hypoallergéniques et fabriqués à partir de matériaux recyclés.

La confection du revêtement de la structure dossier/accoudoir et des coussins de l'assise et du dossier est caractérisée par un cordon et par des surpiques souples d'inspiration couture qui procurent une sensation immédiate de confort due également à la légère courbure du dossier et de l'accoudoir.

Pour augmenter le moelleux, le revêtement du dossier/accoudoir est doublé d'un tissu multicouche matelassé en fibre thermoliée de forte épaisseur et toile de coton blanche.

Coussins: rembourrage des coussins d'assise et de dossier en plume d'oie cloisonnée de forte épaisseur pour apporter beaucoup de moelleux et augmenter le confort, soumise à un traitement d'assainissement conformément au règlement CE 1069/2009 (Certifiée Assopiuma, Label Or). Par la suite, ils sont recouverts d'un tissu multicouche en fibre thermoliée respirante et toile de coton blanche hypoallergénique. Coussins d'assise avec insert en mousse polyuréthane à densité différenciée haute résilience, recouvert sur le dessus de matériau polyuréthane termosensibile. Coussins de dossier avec insert central en mousse polyuréthane à densité différenciée haute résilience, également termosensibile et façonné pour épouser parfaitement les formes raffinées et fonctionnelles du dossier rembourré.

Déhoussage: structure, coussins d'assise et de dossier entièrement déhoussables dans toutes les versions (tissu ou cuir).

Piètements: portants, en aluminium extrudé peint couleur Bronze brillant anti-traces de doigt et patins glisseurs en polyéthylène de couleur bronze.

Pour permettre le déhoussage, les éléments dossier/accoudoir sont faciles à retirer de leur logement en tournant les poignées prévues à cet effet et situées sous la structure portante. Si nécessaire, cette opération peut également être effectuée pour faciliter le transport et la livraison.
