

NIME

**THE ABSCENCE IN ITS PRESENCE,
THE PRESENCE IN ITS ABSCENCE.**

The black hole reflects no light, but the light of Nime finds its way out.
The tangible part disappears inside its heart, and the intangible part
illuminates the object.

PATENT PENDING

THE FIFTH FORM OF LIGHT

The first form of light is
in the source.

The second is
the invisible form of light itself.

The third is the form of the object
revealed by light before it touches it,
the fourth is the form of the shadow.

And the fifth is the form of the
consequence that comprises all the
previous four forms, as well as the
way we feel and experience the space
considering the four forms.

BY DEAN SKIRA

Better not underestimate Nime, as the aperture of only 10mm is only the façade that hides away a host of possibilities to control your beam. Within the same opening and thanks to an ingenious set of custom optics, Nime allows you to focus the beam from 20° up to 40° and offers rotation up to 355° and tilting up to 30°, without changing its looks. With this magic trick, Nime lets you:

- Light up small to large objects, even when they are not aligned with the luminaire.

- Perfectly address the light where it is needed, even in slope ceilings.

- Create equal circles of light from both low and higher ceilings.

DEAN SKIRA

is the founder of **SKIRA**, an award-winning practice based in Pula (Croatia).

Dean is travelling in light and walking through shadows. What started as design work with tangible forms, over the past 30 years, developed into building and creating with the intangible and the ephemeral.

INVISIBLE, YET TANGIBLE.

The effect is there, but where does it come from? With a miniature aperture of only 10mm, Nime focuses on what is important and puts it in the spotlight. It's not about Nime, it's about what Nime can do.

The combination of its focusable beam angle together with its adjustability allows for a multitude of application possibilities, while maintaining a uniform look and feel throughout the project.
