

INFORM

A WORKING TOOL

The Inform family is an extensive range of linear and curved lighting solutions, designed to be used in applications that include task areas, like landscape offices, meeting rooms, reception desks, home office, ... Areas which need technical architectural lighting at its best: eye for design, eye for the user and eye for performance. The base of this family is a combination of Delta Light's Melanopic Light Technology (MLT) with high efficient louvre optics.

ULTIMATE VISUAL COMFORT

Different from the fluorescent tubes, a LED array is build up out of multiple LEDs. Therefore, the reflector is designed to perfectly embrace every individual LED module in a way to boost the efficiency of the complete luminaire while maintaining a high level of visual comfort as every LED dot is shielded from being looked into.

INFORM SQ

PURE MINIMALISM

Inform SQ breathes refinement in all its aspects. Its slender dimensions of 28 by 28mm weld in seamlessly in any architecture. By letting the power run over the suspension cables, there is no need for additional supply cables, emphasizing the minimalistic looks of the profile.

The subtle details empower its sublime design: the recessed endcaps with integrated logo, the multiple colour combinations, the design of the powerbox in line with the profile design, all of them adding to the pure minimalism where Inform SQ stands for.

HIGH PERFORMER

Despite its minimalistic design, Inform SQ does not compromise on performance. With a delivered lumen package downwards of up to 3045lm per meter, Inform SQ is perfect for illuminating task areas like office desks or reception counters.

Within the same dimensions one can also opt for a down-up version of Inform SQ, enhancing the sense of space and creating a uniform glow on both vertical as horizontal surfaces, which leads to a reduced contrast and relaxes the eye.

HUMAN IN THE CENTER

The human aspect is the central topic for Inform SQ. It offers state of the art LEDs that help control the human circadian rhythm via a unique spectrum meant to stimulate activity. The high quality LEDs provide a very natural white colour with a higher amount of energy in the cyan region, helping you to be active during the day and encourage sleep at night.

Different geometric shapes - based on 1 curved segment - to feed your expressiveness and imagination: combine different forms, use quirky colour combinations, diversify different application areas by alternating Inform SQ with Inform R, feel free to play!

INFORM R

PATENT PENDING

CREATIVE FREEDOM

Who says light for the workplace needs to be boring? Inform R enables you to bring a touch of creativity into the clean and straight lines of the contemporary office environment.

Inform R is a family of atypical shapes which are still compliant with the EN 12464, the standard for office lighting. Different geometric shapes - based on 1 curved segment - to feed your expressiveness and imagination: combine different forms, use quirky colour combinations, diversify different application areas by alternating Inform SQ with Inform R, feel free to play!

D-LINER INFORM

SPECIAL CEILING SOLUTIONS

To keep up with the changing regulations for building and renovating, challenges arise on how to combine lighting, ventilation and acoustics into technical or smart ceilings in the best way possible. Part of these ceilings build on modularity and allow for a linear lighting solution in between or in line with the panels. The typical mounting brackets on D-Liner Inform allow for an easy installation into different kind of linear ceiling solutions. As the combination of high efficiency and a high level of visual comfort is crucial for offices - an area where this kind of ceilings are being made - D-Liner Inform is a perfect addition to the existing D-Liner range.

INFORM M

ACCENT, DECORATIVE AND TASK LIGHTING

Inform M is an addition to our magnetic profile range. For any multi-purpose area, now you have the possibility to combine the existing spotlight and pendant modules together with this high-performing modules for task areas. Create and recreate your desired setting, as each of these modules can easily be repositioned thanks to the simple magnetic connection between profile and module.

By simply clicking the module into the profile, the electrical connection is made and your luminaire is ready for the task, wherever you mount it. Additional sensor and modulator modules allow you to further upgrade the light setting to your preference, by DALI dimming or by using CTRL Delta on your smartphone.
