

MULTIFLEX

Cherner

Dimensions

Multiflex storage is available 60" lengths and 29" and 21" heights. All multiflex units are 20" deep.

Finish

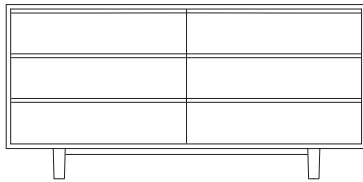

Multiflex units are available in Natural Walnut finish (clear coat only) or Classic Walnut finish (stain plus clear coat). Finishes are water based low VOC

Overview

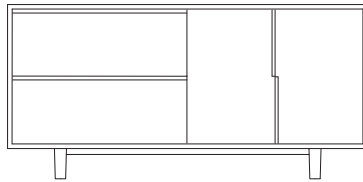

Multiflex casegoods are hand-made in the U.S.A. from laminated and molded plywood. The carefully mitered joinery is expressed in the exposed and profiled multi-ply edges. The American Walnut veneer is hand selected and sourced from sustainably farmed forests.

The strong all plywood cabinet has either all drawers, all doors or drawer/ door combinations. All cabinets have one adjustable shelf. Every door or drawer is articulated with a unique molded plywood pull. A finished back panel allows the additional flexibility of placing Multiflex anywhere in a room.
